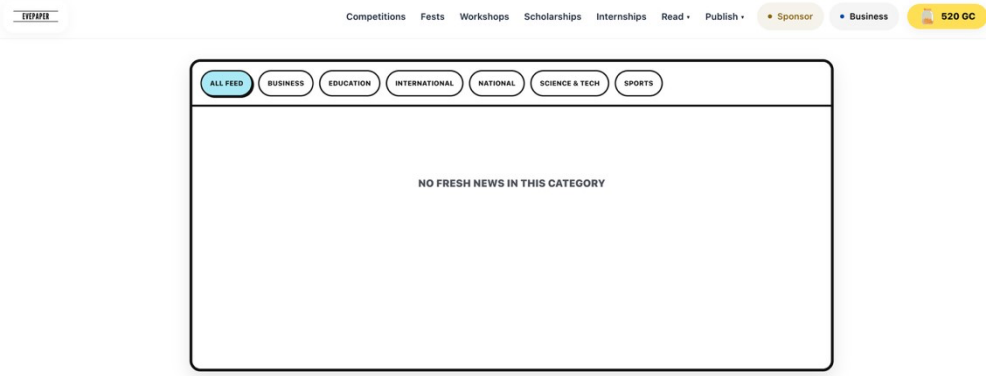
Issue 01 - News Page Shows No Articles — Category Tabs All Empty

URL -

https://evepaper.com/news/



Navigation Path

Homepage → Read → News

Description -

When visiting the News section,
the page displays category filter tabs — ALL FEED, Business, Education, International, National, Science & Tech, and Sports — but every single tab, including the default ALL FEED view, shows the message 'NO FRESH NEWS IN THIS CATEGORY'. No articles, headlines, or news cards are visible at all. The page only contains a banner redirecting users to a WhatsApp Community for live updates. This is highly misleading: the News section is prominently listed in the main navigation, giving users a clear expectation of content, but the landing page is effectively empty. A user arriving here for the first time has no idea whether the section is broken, temporarily down, or permanently abandoned.

Suggested Improvement -

Either populate the News section with at least a few recent articles so the page feels active, or add a clear notice at the top explaining that coverage has shifted to the WhatsApp Community — with a prominent call-to-action link. Alternatively, consider removing the News tab from the main navigation until the section has enough content to justify its presence. Keeping an empty section in the nav hurts user trust.

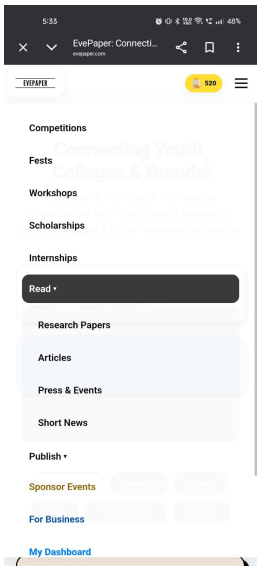
Issue 02 - 'News' vs 'Short News' Label Inconsistency in Navigation

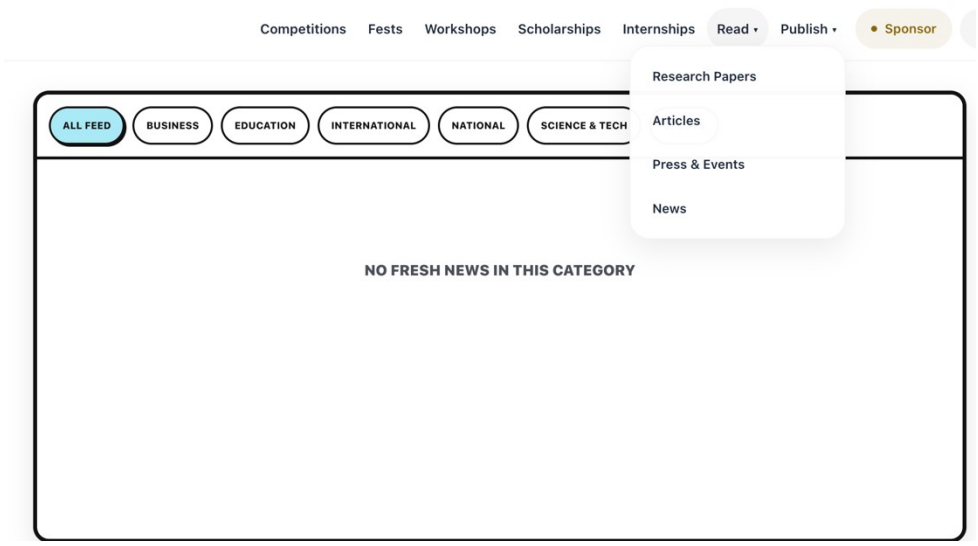
URL –

https://evepaper.com/news/

Navigation Path -

Desktop Header → Read → 'News' & Mobile Nav → Read → 'Short News'





Description-

The same News page (evepaper.com/news/) is referred to by two different names depending on where the user looks. In the desktop header dropdown under 'Read', the link is simply labelled 'News'. However, in both the mobile navigation menu and the website footer, the identical link is labelled 'Short News'. This inconsistency, while seemingly minor, creates confusion — a user who reads 'Short News' in the footer may not immediately realise it leads to the same page they saw labelled 'News' in the header. It also suggests the label was not updated uniformly when the section name changed.

Suggested Improvement-

Standardise the label across all three locations — desktop nav, mobile nav, and footer — to a single consistent name. If the section is meant to feature short-form news, 'Short News' is more descriptive and should be used everywhere.

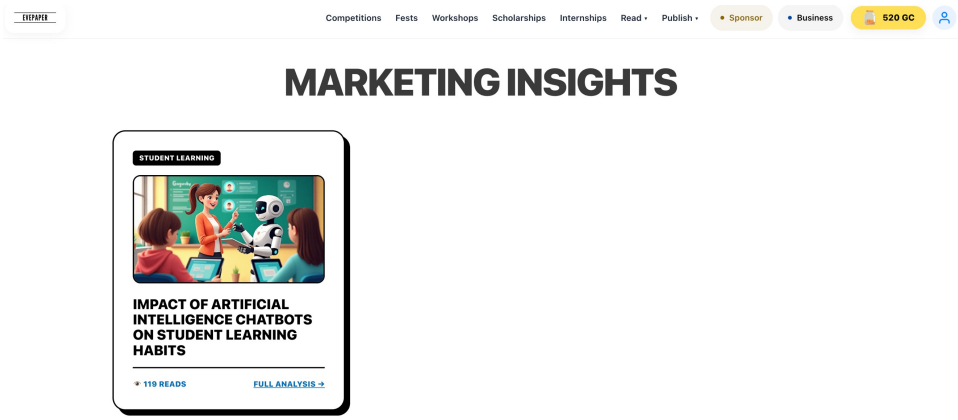
This can typically be fixed in the WordPress menu settings or theme navigation editor within a few minutes

Issue 03 - Articles Section Has Only One Article — No Search, Filters option.

URL - https://evepaper.com/youth-marketing-insights/

Navigation Path -

Homepage → Read → Articles



Description -

The Articles section, labelled 'Youth & Marketing Insights', is a dedicated content page under the Read dropdown.
However, the entire page currently displays only a single article: 'Impact of Artificial Intelligence Chatbots on Student Learning

Habits'. There are no category filters, no search bar, no sort options (by date, topic, or popularity), and no pagination controls. For a section that is prominently promoted in the navigation and is meant to serve as a reading destination for youth and marketing content, having just one article with no browsing functionality makes the section feel incomplete. A new visitor would likely assume the page has not been launched yet or that the content is broken.

Suggested Improvement -

Add at least 3-5 articles to the section so it looks like a functioning content library. In the medium term, implement category tags (e.g. Marketing, Education, Career, Tech) and a simple search bar so users can discover related. If more articles exist elsewhere on the site, they should be surfaced here. Pagination or a 'Load More' button should also be added once content grows beyond 8-10 articles.

Issue 04 - Research Papers Domain Filter Shows Blank Page — No Empty Message

URL –

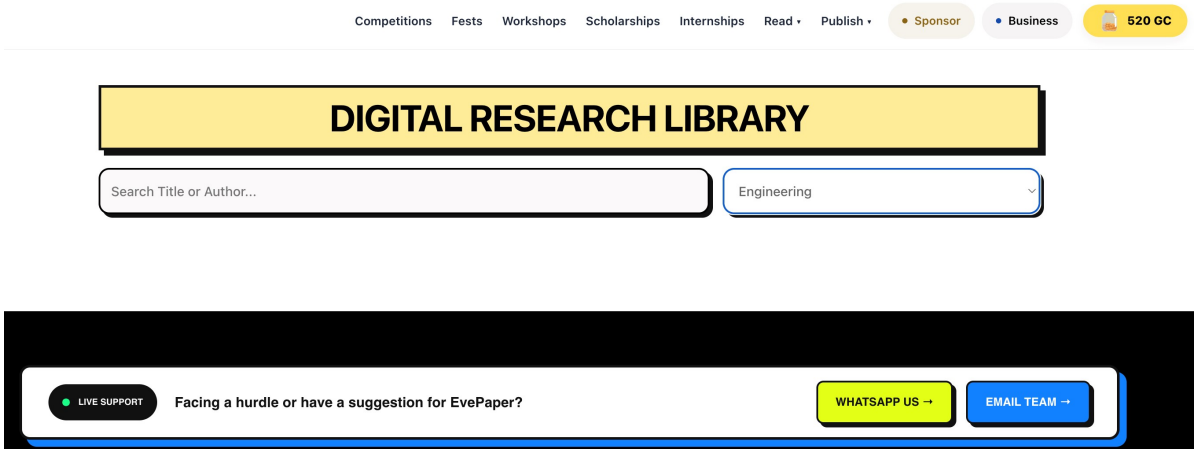
https://evepaper.com/research-papers/

Navigation Path –

Homepage → Read → Research Papers → Domain Filter Dropdown

Description –

The Research Papers page includes a domain filter dropdown with multiple categories — Engineering, Management, Science, Law, Commerce, Social Sciences, Healthcare, and Others. However, only 2 papers currently exist on the site, both filed under Science. When a user selects any other category such as Engineering, Law, or Commerce, the page content area goes completely blank — no papers appeand no message is shown. There is no 'No results found', no 'No papers in this category yet', and no guidance whatsoever. To a first-time visitor, this looks exactly like a broken filter or a page loading error, rather than a category that simply has no submissions yet. It significantly damages trust in the platform's reliability.



Suggested Improvement –

Add a simple empty-state message that appears when a selected domain returns no results — for example: 'No research papers in this category yet. Be the first to publish one!' along with a link to the submission page. This reassures users the filter is working correctly and turns a dead end into an opportunity to drive submissions. This is a standard UX pattern and can usually be implemented with a short conditional block in the page template.
